# 1. INTRODUCTION

## 1.1. PROJECT BACKGROUND AND PURPOSE OF THIS DOCUMENT

The Consortium of Daelim, Limak, SK and Yapı Merkezi has secured a 16 year 2 months 12 days concession to build and operate the Malkara – Çanakkale Segment, including the 1915Çanakkale Bridge (the Project), of the Kinalı – Tekirdağ – Çanakkale – Savaştepe (Kinalı – Balıkesir) Motorway through an Agreement with the Turkish Ministry of Transport, General Directorate for Highways (KGM - Türkiye Cumhuriyeti Ulaştırma Bakanlığı Karayolları Genel Müdürlüğü). ÇOK A.Ş. is the Turkey based company (Special Purpose Vehicle – SPV) created by the Consortium for implementing the Project.

The Motorway is 88 km in length and the Bridge is about 3.6 km long (including a mid-span of 2023 m, making it the world’s longest suspension bridge). The Project is part of the larger 324 km long Kinalı – Tekirdağ – Çanakkale – Savaştepe Motorway Project (see Section 1.2 below).

In conformance with Turkish regulatory requirements, an Environmental Impact Assessment (EIA) Study (based on Turkish EIA regulations) for the entire 324 km long motorway entitled “Kinalı – Tekirdağ – Çanakkale – Savaştepe 1<sup>st</sup> and 2<sup>nd</sup> Section Motorway EIA (Motorway EIA)” was completed in November 2016 and approved by the Ministry of Environment and Urbanization in 23 November 2016 (Decree no. 4388).

ERM GmbH (ERM) was contracted by Çanakkale Otoyol ve Köprüsü İnşaat Yatırım ve İşletme A.Ş. (ÇOK A.Ş.) to conduct an Environmental and Social Impact Assessment (ESIA) in compliance with the international standards for the Malkara – Çanakkale Motorway, including the 1915Çanakkale Bridge.

The ESIA has been prepared to comply with the Equator Principles, International Finance Corporation’s (IFC) Performance Standards on Social and Environmental Sustainability, the IFC General Environmental, Health and Safety Guidelines, the specific Health and Safety Guideline for Toll Roads and other relevant international standards e.g. World Bank Operational Policies and European Union Directives.

This document is the Stakeholder Engagement Plan (SEP) of the proposed Project, which was prepared as part of the ESIA.

Previous version of this document was publicly disclosed together with the draft ESIA Report, Non-Technical Summary (NTS), Environmental and Social Management Plan (ESMP) and Guide to Land Acquisition and Compensation (GLAC), ESIA Brochure, and Grievance Form to receive comments and opinions of public during the Project development. However, SEP is a living document and as the Project progresses, the document needs to be updated and publicly shared for meaningful engagement between Project stakeholders and ÇOK A.Ş.

In this regard, main purpose of the Project's current Stakeholder Engagement Plan can be summarized as follows:

- Addressing current stakeholders of the Project
- Explaining the methods and frequency of communication at construction stage
- Describing the roles and responsibilities
- Explaining the grievance mechanism
- Explaining provisions for information disclosure at construction stage
- Outlining the requirements in relation to monitoring and reporting

It should be noted that, although this document will be conclusive of general information in relation to Project's all stakeholders, focus will be on the management of engagement activities in relation to local people.

## 1.2. BRIEF PROJECT DESCRIPTION

The Project is part of the wider Kınalı – Tekirdağ – Çanakkale – Savaştepe Motorway (shown in **Figure 1**) with a length of 324 km, which is one of the key projects for national development.

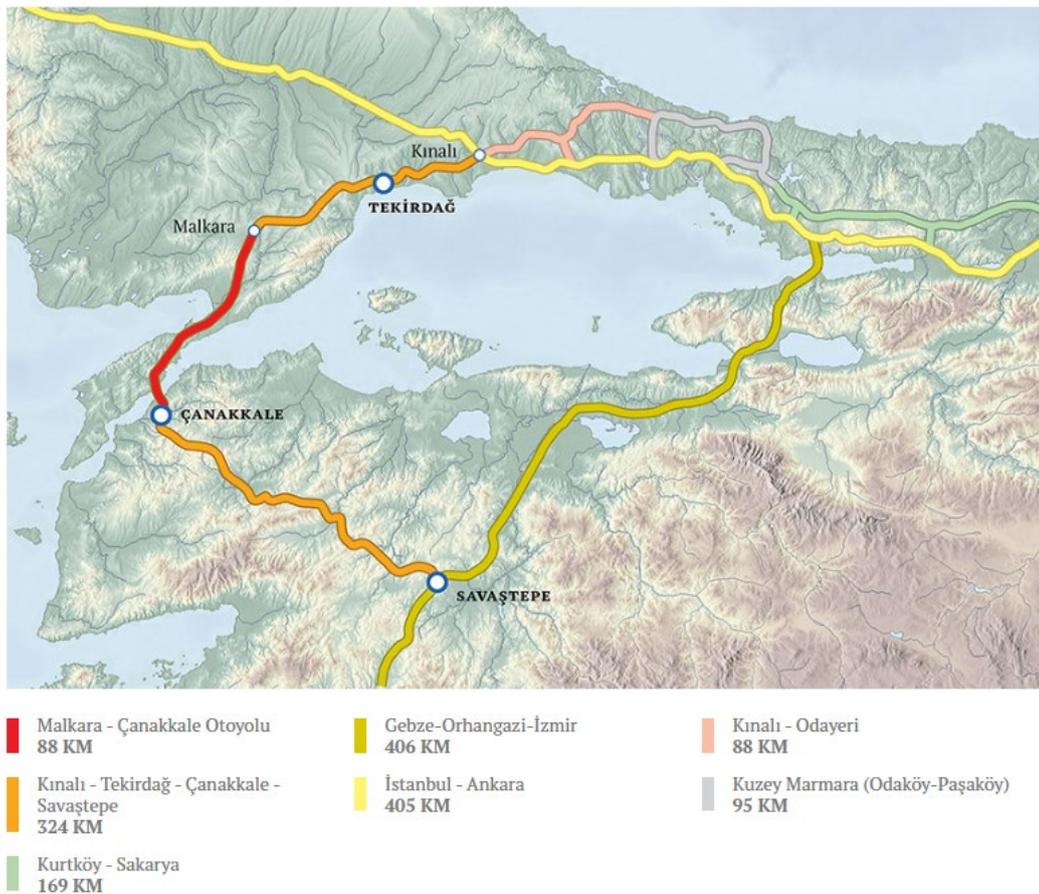

Figure 1. Overview of the Kınalı - Balıkesir Motorway Project

The Project (**Figure 2**) covers solely the segment of the Kınalı – Savaştepe (Balıkesir) Motorway starting at the Malkara Junction at around KM: 106+840 and ending at Çanakkale at around KM: 191+707 for a total of 88 km long motorway section including the 1915Çanakkale Bridge. The route is planned as three lanes in each direction for a six-lane motorway. All intersections in the Project will be single and one-way direction lanes. The general Motorway speed will be 120 km/h, 100 km/hour, 80 km/hour on exits and entrances and 50 km/hour under poor conditions in accordance with topography and ambient. The Project can be sub-divided into three sections:

- A - Malkara Junction – Gelibolu South Junction
- B - Gelibolu South Junction – Çanakkale 1 Junction and 1915Çanakkale Bridge
- C - Çanakkale 1 Junction – Çanakkale 2 Junction

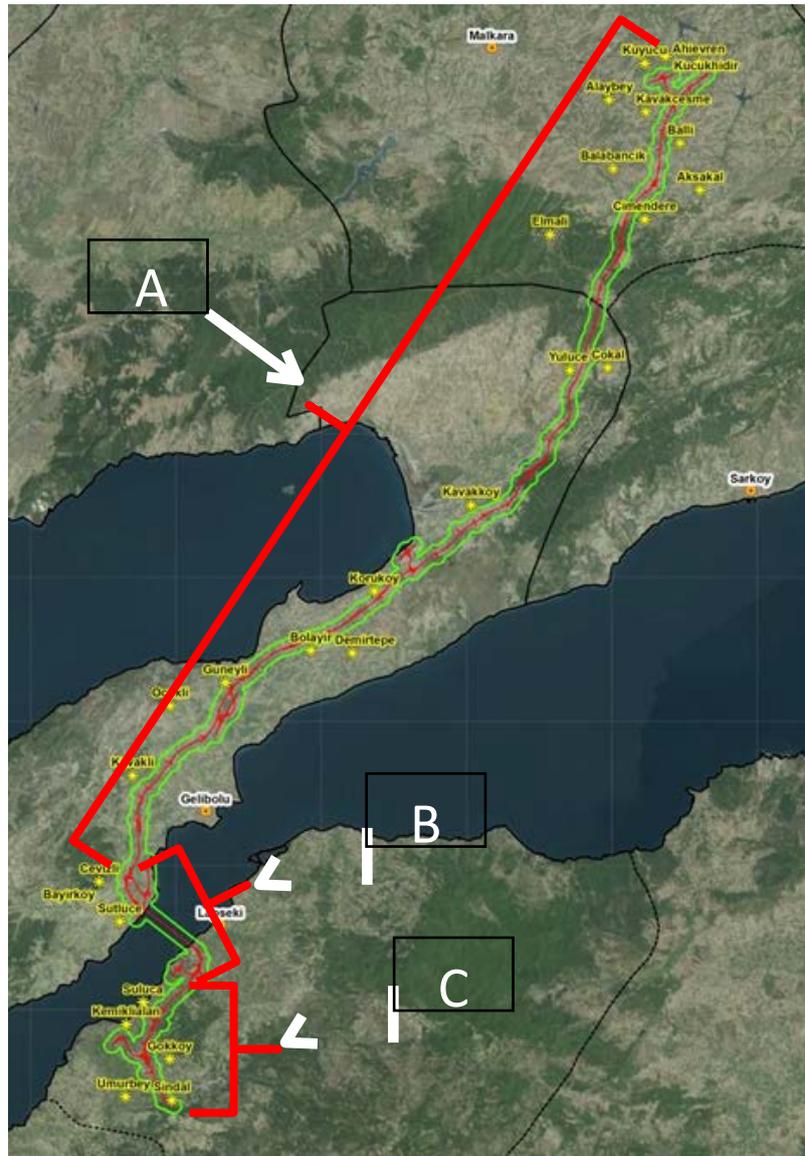

Figure 2. Overview of the Project (Motorway Section and the Bridge)

Source: ERM, 2017

Project construction works started in March 2018 and are planned to be completed in March 2022.

## 2. PRE-ESIA CONSULTATION ACTIVITIES & PUBLIC CONSULTATION PROCESS

KGM has already obtained the approvals for the overall Kınalı – Balıkesir Motorway, and an Environmental Impact Assessment (EIA) was conducted and approved in 2016. The EIA process included five public consultation meetings with residents and government officials along the route as required by the Turkish EIA regulations.

Then, a 30-days Public Consultation process for the 1915Çanakkale Bridge and Motorway Project comprising of extensive field activities along the route was carried out where the disclosed draft Environmental and Social Impact Assessment (ESIA) and associated documents were shared with stakeholders. The public was also provided with the opportunity to comment on the ESIA documentation for another 30-days after the formal public consultation period was completed. An approximate total of 1000, including 856 registered and more than 100 unregistered individuals attended the public disclosure events held along the route. ESIA Report has been finalized in accordance with the comments of the public and disclosed through project communication channels.

More detailed information on this period is disclosed to public via Consultation Report of the Project in our website <http://www.1915canakkale.com/>.

## 3. STAKEHOLDER ENGAGEMENT PROCESS

Continuous public engagement during all phases of the Project is the responsibility of ÇOK A.Ş. Stakeholder feedback is a key component in the final determination of the effectiveness of mitigation measures and for the overall monitoring of the successful implementation of the ESMP. The SEP is a living document and will be updated by ÇOK A.Ş. to refine planned regular community liaison activities and notification of exceptional events as the Project progress.

Engagement activities include, but not be limited to:

- Regular Project updates and progress information for affected settlements. Project updates are made widely available in the villages via Muhtars' offices and other public places and on the Project Website
- Information and training on construction works and precautions are being provided to the local community prior to the works in the vicinity of settlement
- Support to KGM on the communication regarding the expropriation works with Project Affected Persons
- Regular community meetings and discussions with local people in affected settlements, are being planned and performed by the CLOs. CLOs visit Project affected settlements on a periodic basis to maintain engagement with the local population. Date and time of these

visits are announced at least two weeks in advance. The frequency of the visits is being determined based on local needs in each of the villages (on average e.g. once a month)

- Special meetings for vulnerable groups; e.g. women meetings are being held on village level by female CLOs to make sure that their concerns are addressed as well
- Regular marine construction information and precautions are being provided to Fishermen and Ferry Company in the vicinity of the works
- Announcements and information for affected settlements related to construction activities, including any activities likely to cause disturbance (such as temporary road closures, particularly noisy activities). These are announced through press releases to local media, village newsletters to Muhtars' offices and other public places, information provided directly to affected households and businesses, and updates on the Project Website
- Information on local employment and procurement process is being provided to local communities, potential contractors and suppliers via Muhtars
- Further environmental and social studies are being disclosed to public through Project Communication Channels (Website and Muhtar Offices where required)
- Annual reports are disclosed to the public on environmental, social health and safety performance and implementation of the action plans and grievance procedure
- Information to communities immediately [e.g., 1 week] prior to works in their area with information on safety, reminder of the Grievance Procedure
- During the implementation of the Community Level Assistance Program, close communication is ensured with local communities and Muhtars. The Community Level Assistance Program was developed with active participation by the affected communities

### 3.1. CURRENT STAKEHOLDERS OF THE PROJECT

Stakeholders	Platform of Dialogue	Frequency of Dialogue	Stakeholders	Platform of Dialogue	Frequency of Dialogue

### 3.2. COMMUNITY LEVEL ASSISTANCE PROGRAM

There are 32 settlements identified as being located within the 500 m corridor (both sides of the centerline) defined as the Project study area. Out of these 32 settlements, 26 (6 urban type and 20 rural settlements) are affected by expropriation of land required for the Project.

ÇOK A.Ş. implements, with the approval of KGM, a Community Level Assistance Programme (CLAP) with the intention of complying with international lender requirements, namely that the persons affected by the Project should not be socio-economically worse off than before, and preferably in an improved situation and SÜRKAL was selected to be the Lead Implemented Partner.

SÜRKAL (Sustainable Rural and Urban Development Association) was founded in order to contribute to processes of development through small-scale projects, human-centred approaches and replicable models in those areas of the country most in need of development. This is both the mission and vision of the association. Despite its experienced staff and workers, SÜRKAL is rather young as a voluntary and non-profit organization focusing on rural development. SÜRKAL submitted its application to relevant authorities in October 2000 and it was officially established in June 2001 upon the endorsement of its Bylaw.

Four programmes designed for CLAP are:

- Programme 1 – Skills development and access to markets
- Programme 2 – Institutional Capacity Building
- Programme 3 - Natural Resource and Sustainable Energy Sources
- Programme 4 - Community Health, Safety and Wellbeing

Site implementation of the Community Level Assistance Programme was initiated in May 2019 and the Program is expected to continue until March 2022.

### 3.3. VULNERABLE PEOPLE

In December 2019, a strategy document explaining Project's approach to vulnerable people was developed. Following subjects were addressed in the strategy:

- Identification of vulnerable people
- Communication with vulnerable people
- Opportunities and priorities for vulnerable people
- Monitoring process

Based on the principles explained in this strategy document, vulnerable people within the Project's impact area were identified and logged in the Project's Vulnerable People Register. During this process, individual meetings were carried out and vulnerability criteria of the people were evaluated. Criteria used during the identification of vulnerable people are as follows:

- Single parent-headed and elderly-headed households
- Unemployed youth and youth-headed households
- Widows/widowers
- Migrants, refugees
- Ethnic groups (Roman people, etc.)
- Illiterate people
- Farmers who lost more than 70 % of their entire lands by expropriation
- Large families with low income (especially including unemployed family members)
- Seasonal agricultural workers
- People with disabilities
- Elderly or infirm people in need of care or without family support
- People who does not possess any land
- People with earning at/below the minimum wage line
- Physically displaced people
- Economically displaced people that loses their main income
- Homeless affected people
- Significantly affected tenants

Restoring and enhancing the livelihoods and living standards of PAPs and vulnerable persons is the overall objective of Community Level Assistance Program (Please see Section 3.2). Participation of vulnerable people and PAPs (both economically and physically displaced) into the CLAP activities are being continuously monitored. In addition, specific supports to be provided to vulnerable people and PAPs will be determined based on the outcomes of the second-round interviews. Supports will be provided through CLAP and are expected to continue until March 2022.

### 3.4. STAKEHOLDER ENGAGEMENT ACTIVITIES DURING COVID-19

COVID-19 pandemic affected the whole world in a very short amount of time and precautions such as wearing masks in public and social distancing became the new normal of our daily lives. In the light of these precautions, interaction practices of our Project's Stakeholder Engagement and Grievance Management Mechanism activities have been changed accordingly.

During COVID-19 pandemic, traditional and face-to-face interaction was replaced with electronic communication as a first response action. Management of grievances was not interrupted and communication between CLOs and related departments especially construction teams have been very strong. Since CLOs were not able to visit local communities, they used electronic communication to inform stakeholders during this timeframe which provided faster access and increased the interaction between CLOs and local stakeholders. In addition to meaningful engagement in relation to Project, CLOs also provided necessary information regarding prevention from the COVID-19 in accordance with the Governmental Guidelines. Towards June 2020, face-to-face engagement activities were reinstated with respect to restrictions being lifted by the Government. Stakeholder engagement, information disclosure and grievance management activities will be carried out without any interruption in the next COVID-19 period in accordance with a Continuity Plan inclusive of the practices in relation to vulnerable people, CLAP and PAPs as well.

## 4. GRIEVANCE MECHANISM

In accordance with international good practice, a so-called "Grievance Procedure" has been established which Project Affected People (PAPs) and other interested Stakeholders can submit their complaints, questions or comments in relation to the Project during its entire lifecycle.

A Public Grievance Form (see Appendix 1) is available for recording grievances. Once a grievance is submitted to ÇOK A.Ş. it is being logged in a register where it is tracked through to a satisfactory conclusion. The grievances are reviewed by the responsible personnel within ÇOK A.Ş. or DLSY JV and any required corrective actions are being identified.

Grievances can be submitted at any time by PAPs and other stakeholders through the following means:

- Grievance Forms to be submitted via the Muhtars, by e-mail (Yapı Kredi Plaza, B Blok, Kat: 12, Daire 30, Büyükdere Caddesi, Levent, 34330 İstanbul) or by e-mail to [info@1915canakkale.com](mailto:info@1915canakkale.com)
- Calling the Project Hotline at **0850 281 44 88**
- Sending written grievances to the ÇOK A.Ş. office postal address: Yapı Kredi Plaza, B Blok, Kat: 12, Daire 30, Büyükdere Caddesi, Levent, 34330 İstanbul
- Submitting a grievance in person to Community Liaison Officers (CLOs) or to Muhtars if a stakeholder is not able to or comfortable submitting a grievance in writing

#### 4.1. MANAGEMENT PROCESS

- Grievances are being addressed in a fair and transparent manner. Confidentiality aspects in relation to grievances received are maintained.
- Grievances are being reviewed as soon as they are received/collected by the CLO in the field, by case, and prioritised for resolution.
- All grievances received through this mechanism are being acknowledged within 5 days and are resolved within a total of 30 days.
- The **Figure 3** below describes the process defined for managing grievances from communities and/or other external stakeholders.

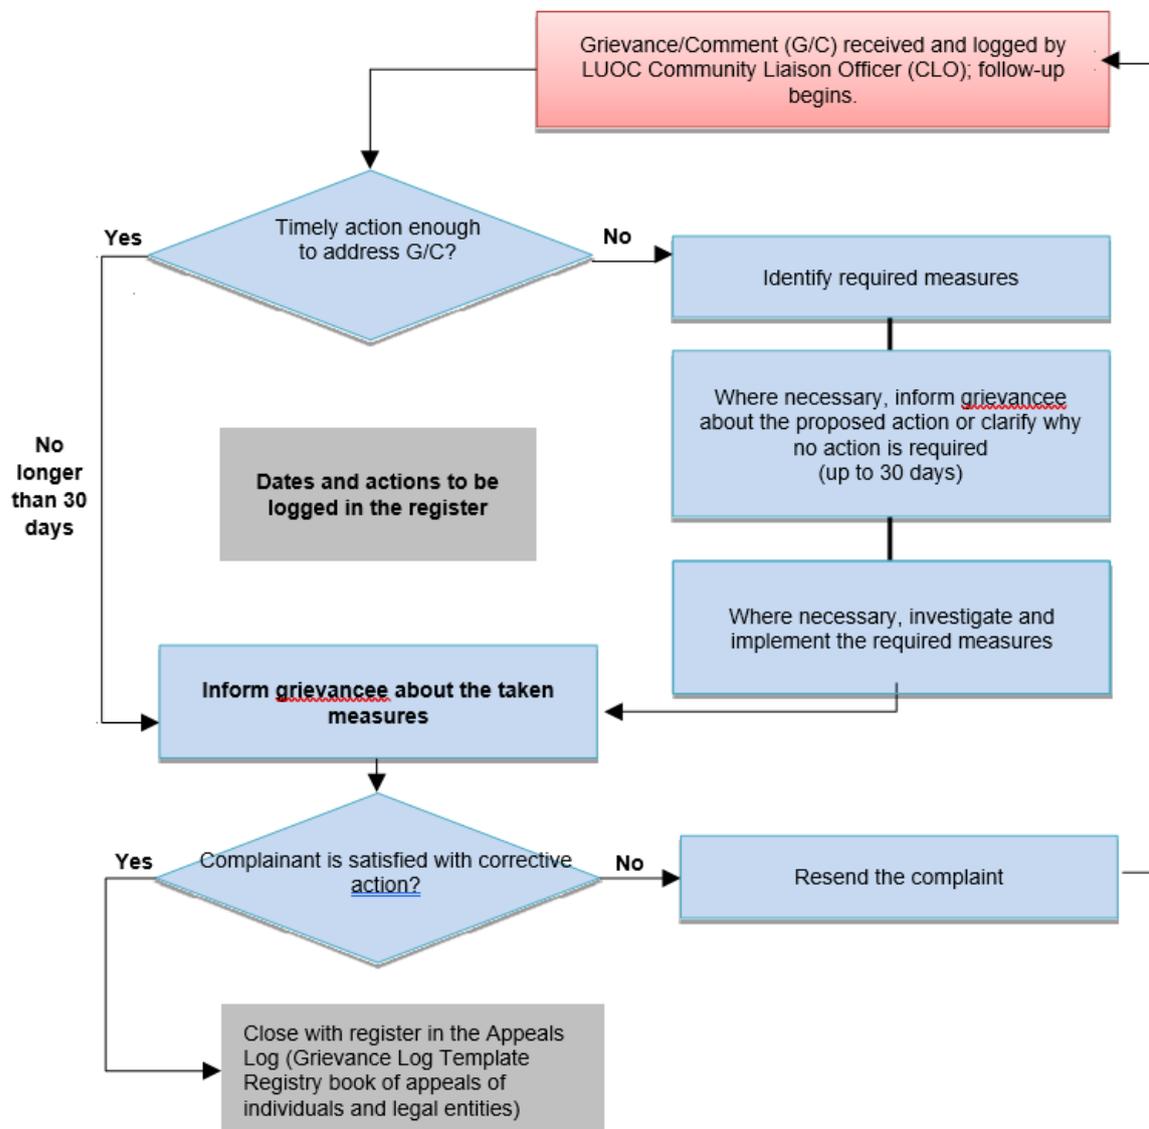

Figure 3. Grievance Mechanism

## 4.2. LOGGING

A data base was developed to manage and monitor grievances. For every grievance received, the following information is being logged in this database:

- The name and contact details of the grievance
- The date and nature of the grievance
- The name of the technical staff charged with addressing the grievance, if appropriate
- Any follow up actions taken
- The proposed resolution of the grievance
- How and when relevant Project decisions were communicated to the grievance
- Whether longer-term management actions have been taken to avoid the recurrence of similar grievances in the future, if applicable

## 4.3. RECORDING OF GRIEVANCES

The CLOs monitor the following indicators in relation to the grievances received and these are being included in the periodic project monitoring reports to the international lenders and/or external communications of ÇOK. A.Ş.

- Number of grievances during the reporting period
  - Opened
  - Resolved
  - Closed
- Categorisation of grievances (as relevant to the project – for example, land acquisition /compensation/noise/traffic / safety)
- Trend in time (for example, number or category of complaints compared with previous reporting periods)

ÇOK. A.Ş. and DLSY JV keeps a profile of those who lodge a grievance by gathering data such as gender and location (while still guaranteeing that those who wish to register a grievance can remain anonymous and are free to give as little personal information as they wish). Collecting such profile information is useful to gain an understanding of who and where is most affected by potentially negative impacts of the project.

## 5. ROLES & RESPONSIBILITIES

### 5.1. RESPONSIBILITIES

ÇOK A.Ş. has the overall responsibility in relation to implementation of this SEP. ÇOK A.Ş. further coordinated and agreed with KGM regarding how certain engagement activities needs to be

conducted. Engagement activities conducted by KGM for this Project are also supported and reported by ÇOK A.Ş and DLSY JV.

ÇOK A.Ş.'s Environmental and Social Manager is responsible to monitor the implementation of the SEP. Information about the implementation of the SEP is included in the Annual Environmental and Social Report for the Project.

The responsibility to manage and solve grievances received lies with ÇOK. A.Ş. and DLSY JV including for the situations where contractors are involved. Although there may be situations when a grievance is passed to a third party for resolution, the ultimate responsibility for grievance resolution lies with ÇOK. A.Ş. and DLSY JV, including for cases where the contractor fails to reach an acceptable resolution. To ensure the third parties' buy-in with the receipt and solution of grievances, ÇOK. A.Ş. included relevant clauses and conditions concerning grievance management, resolution and respective responsibilities in their contracts with the EPC and/or other contractors.

In case of grievances related to the expropriation, ÇOK. A.Ş. informs that KGM is responsible for this process and refers the respective stakeholder to KGM for resolution. Additionally, ÇOK. A.Ş. provides the addresses of the two expropriation offices set up in the municipalities of Lapseki and Gelibolu to support directing the grievances to the relevant persons who are able to address them.

## 5.2. COMMUNITY LIAISON OFFICERS

DLSY JV E&S Manager and Community Liaison Officers (CLOs) are stationed in the field at central locations of the Project area. They travel on a regular basis along the Motorway route and talk to the PAPs and other stakeholders to inform them about the Project, the ESIA/ESMP and the expropriation activities. CLOs' contact details are made available to the Muhtars and settlements in the SAOI and other stakeholders.

The CLO day to day responsibilities relating to engagement with affected communities during the lifetime of the Project are as follows:

- Provide Project related information on behalf of ÇOK. A.Ş.
- Community interactions
- Receive grievances in accordance with adopted grievance mechanism
- Collect the public views about the Project and answer questions
- Coordinate communication with local communities and follow-up on responding to comments and concerns from public as well as on external communications about the Project
- Manage Grievance Procedure
- Ensure the overall smooth continuation of consultation and Stakeholder Engagement after the Disclosure Period

ÇOK A.Ş. makes sure that the composition of the CLO team will allow to meaningfully address the concerns of women.

## 6. MONITORING & REPORTING

ÇOK A.Ş. has overall responsibility in relation to this SEP. ÇOK A.Ş. further coordinated and agreed with KGM regarding how certain engagement activities needs to be conducted. Engagement activities conducted by KGM for this Project are also being supported and reported by ÇOK A.Ş.

ÇOK A.Ş.'s Environmental and Social Manager is responsible to update this SEP during the construction works when needed and prior to the operation of the 1915Çanakkale Bridge and Motorway. Each SEP update needs to also include information about previous stakeholder engagement activities and a summary of the results. The effectiveness of the stakeholder engagement activities is being assessed to determine if the respective activities have achieved the purpose of ensuring a meaningful consultation of the stakeholders and an informed participation. The results and further conclusions shall be reflected in the future updates of the SEP at following stages of the Project.

<p>ÇOK A.Ş. can be contacted through;</p> <p><b><u>Office Address:</u></b></p> <p>Yapı Kredi Plaza, B Blok, Kat: 12, Daire 30, Büyükdere Caddesi, Levent, 34330 İstanbul</p> <p>Project Hotline: <b>0850 281 44 88</b></p> <p><a href="mailto:info@1915canakkale.com">info@1915canakkale.com</a> (Email) <a href="http://1915canakkale.com/">http://1915canakkale.com/</a> (Website)</p>	<p>For grievances related to expropriation, please see below the addresses of the KGM expropriation offices in Lapseki and Gelibolu;</p> <p><b><u>Office Address:</u></b></p> <p>Gelibolu Office: Yazıcızade Mah. --	---

## 7. STAKEHOLDER ENGAGEMENT DURING OPERATION

The operation phase of the Project will continue over the 10-year lifetime of the BOT contract, during which time ÇOK A.Ş. will be responsible for the safe operation and maintenance of the 1915Çanakkale Bridge and Motorway.

The format and engagement techniques for this future phase of engagement are not yet finalised, but at a minimum will include the basic elements such as the Grievance Mechanism and announcements/updates on the Project Website, as well as normal routes of communication with the ÇOK A.Ş. management. A project hotline will be established, which interested persons can call to obtain information or communicate their grievances.

As operator of a toll-road, it will be in the best interest of ÇOK A.Ş. to maintain safe operations and good relations with the road users and the local public. ÇOK A.Ş. supported by the Operator will be responsible for updating the SEP and identifying stakeholders during this phase. Prior to commencement of the operation phase an updated SEP will be published.
